

Knowledge Management Experts

While nuclear power generation is an economical and realistic answer to the globally expanding demand for energy, it presents a unique set of risks. Such risks are similar to those found in other energy industries, but their alleviation requires a specialized set of expertise and abilities. Next Intelligence is an international community of experts with broad experience in managing knowledge, technology and information ispecific to the nuclear power industry. We believe that knowledge management systems are essential for the stable use of nuclear energy over the long term.

In general industry, in the first half of this century, leading businesses are focused on managing their knowledge property in much the same way as they manage their capital. Next Intelligence provides support for companies that face the challenge of creating new knowledge-oriented business practices.

Our company is an Asia-region NKM expert community that forms an integral part the NKM4YOU, a network of independent nuclear knowledge management consultants.

What Is NKM4YOU?

Established in 2015 & lead by Pasztory Consulting e.U., NKM4YOU is a network of independent consultants and nuclear environmentalists who believe that nuclear energy has a relevant role in the energy mix of most countries. Our subject matter experts came from countries including Canada, the Czech Republic, Hungary, Italy, Japan, Romania, Russia, Slovakia, Spain, the UK, and the USA.

As a result of the service request of our customers, the capability of NKM4YOU network is continuously expanding to include new competencies. NKM4YOU answers the needs of (nuclear) organizations in the development of knowledge management systems/activities, human resource development, and workforce planning issues.

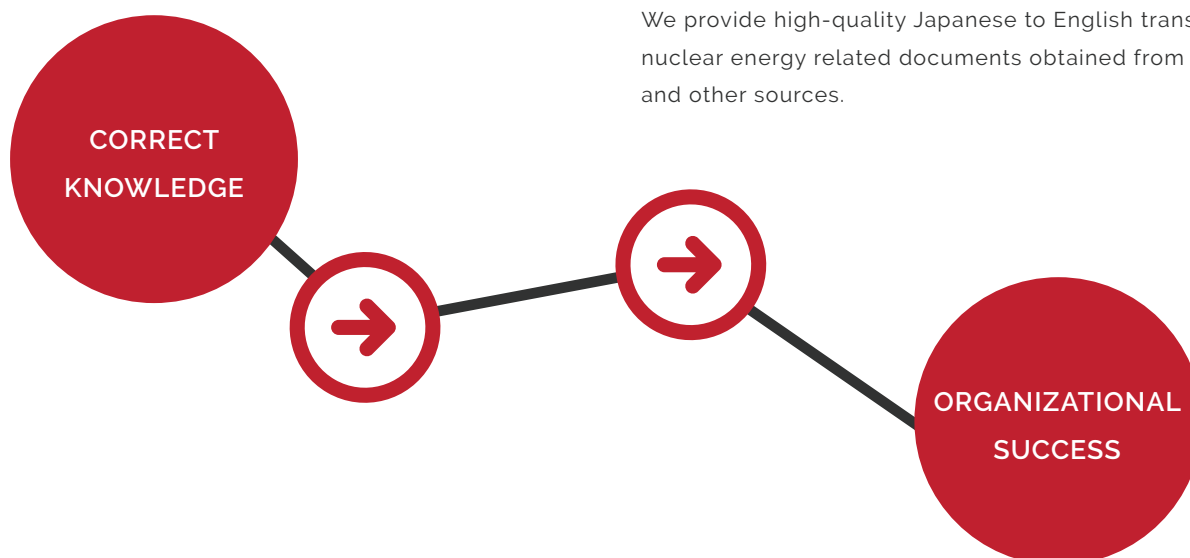

Our Services

Japanese Nuclear Information Surveys

Collection of Japan-based nuclear information (input) and reporting in English (output), including general NKM information, accident and trouble information, and regulatory information.

English Translation of Japanese Nuclear Related Documents

We provide high-quality Japanese to English translations of nuclear energy related documents obtained from surveys and other sources.
